On a ladder, where are you now, and where will you be in 5 years?

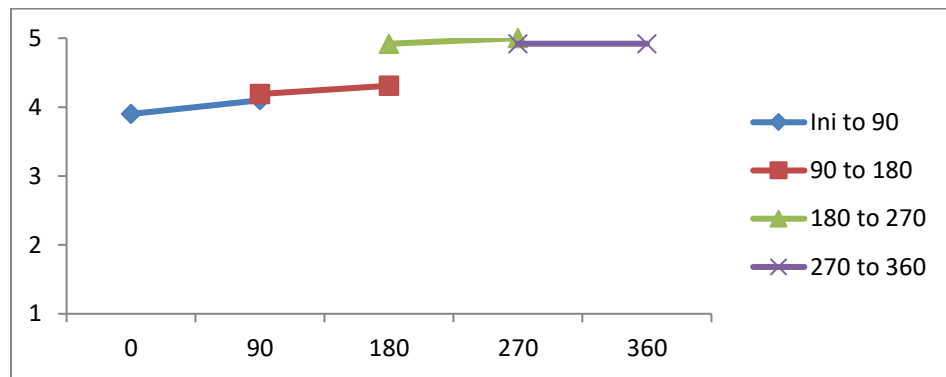

Ladder Now & Future	Initial	Day 90	Day 180	Day 270	Day 360
Where I am now	4.99	5.77	6.18	6.61	6.24
Where I will be in 5 years	9.03	8.94	8.92	9.06	9.10
Difference	4.04	3.17	2.74	2.45	2.86

** All differences between “Where I am right now” and “Where I will be in 5 years” for each time point were statistically significantly different.**

CHANGE OVER TIME

The charts below illustrate the change over time for youth with a matched assessment at two consecutive time-points (e.g., a 90-day assessment and a 180-day assessment). **Each pairing is made up of a different sample of youth**; the youth with assessments at 270 days and 360 days are not the same youth with assessments at 90 days and 180 days. Sample sizes are displayed within the figures, and * indicates a statistically significant change within two time-points with $p < .05$.

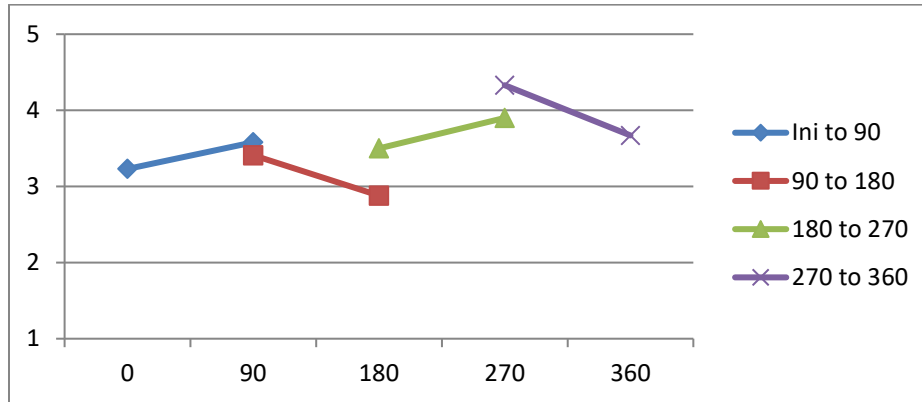

How often do you stay at a place where you know you will not be physically hurt?
