

### Logic Model: King County CSEC Program Grant Funded Activities

**Population of focus:** Child welfare-involved youth who are at risk for or who have been sexually exploited for money or resources

Objective	Primary funded activities	Outcomes	Indicators
Foster strategic coordination and collaboration among public child welfare, juvenile justice, and other key partners	1.0 FTE outreach specialist & 0.5 FTE Children’s Administration liaison Increase program manager FTE Add CSEC references to King County Information Sharing Guide Regular meetings of CSEC Task Force Network analysis to identify links and gaps among partners Recommended activities linked to Year 1 collaboration survey Implement protocol and fidelity tool for conducting MDT meetings Joint case planning and sharing of services	Larger network of key partners Increased collaboration among agency and community partners High quality MDT meetings	Social Network Analysis MDT fidelity tool Stakeholder and youth focus groups Stakeholder survey
Promote the awareness and utilization of multi-disciplinary interventions and quality practice	Identify community resources Identify gaps in services for survivors Evaluate the reasons for under-utilization of multi-disciplinary interventions (such as housing services, TF-CBT, and substance use treatment) by survivors Develop and implement plans to address gaps and barriers to services Training on community resources (see below)	Increased referrals to and engagement in services CSEC partners report reduced barriers to service referrals and engagement Increased knowledge of community resources	Social Network Analysis Administrative data (services) Youth and provider focus groups
Promote the development of policy, quality practice, and other strategies across systems aimed at prevention, identification, and intervention for child welfare youth from human trafficking  Promote awareness of how involvement in child welfare increases the risk of being a victim of human trafficking	In-person and video-based trainings in identifying early warning signs and referral practices: Children’s Administration; UfY Training Institute; Court staff; others Work with CA to improve prevention, identification, and services Expand advocate outreach to better serve communities of color Work with prosecutor’s office to develop an expedited diversion process Development of social media services for proactive outreach, relationship-building, and communication between CSEC youth and advocates Posters in Children’s Administration offices and waiting areas, schools, hotels, with social media contact information Public Service Announcement	Increased referrals to CSEC No disproportionality in referrals, compared to estimates of exploitation Established strategy and written protocols in CA, JJ, education, and other Improved relationships between youth and advocates Youth have longitudinally decreased involvement with juvenile justice, courts, and child welfare Youth have increased housing stability Youth have improved safety	Training satisfaction and knowledge surveys Referral data Youth focus groups Administrative data Youth self-report
Collectively disseminate findings and support knowledge transfer from these projects to the field	Post information on CCYJ and court websites Reports to key stakeholders Regular communication with CSEC Task Force Presentations at national conferences Academic journal articles	Presentations and reports	Descriptions of dissemination activities

Implement a plan for determining specific data elements and gathering these data elements	Develop and implement standardized referral form Develop and implement screening tool Develop and implement regular check-in data from Advocates Identify administrative data and retrieval process	Database developed and maintained to track CSEC participants	Data regularly obtained
Understand and be guided by Washington safe harbor policies	Develop a reference tool identifying WA State "Safe Harbor" policies and laws Include safe harbor information in all trainings and materials	Reference tool developed Safe harbor information included in trainings	Training satisfaction and knowledge surveys
Sustainability	Based on evaluation findings, develop a sustainability plan to sustain key elements of grant projects	Sustainability plan developed and implemented	Synthesis of all data analysis and reports
